# American Rescue Plan Act (ARPA) Justification

Based upon the guidance released by the Department of the Treasury much of the decision on if a purchase can be covered by the ARPA guidelines is based upon the community's justification. Below you will find basic justification reasoning for the high-level need of gWorks products.

The use of funds can be divided in to six categories outline by <u>Treasury</u>, these buckets are broad and can be interpreted in multiple ways. One of the most important factors in expenditures is the use of evidence in your evaluation and the purchase's impact, below are examples of use of that in our justification. The three categories we can most effectively be fit in to include:

- Public Health (EC 1)
- Water, sewer, and broadband infrastructure (EC 5)
- Revenue Replacement (EC 6)

#### Using Public Health Justification:

The gWorks suite of tools enables the community to facilitate transactions with reduced face to face and enhanced resident self-service options. These tools can expect to have multiple impacts for both residents and staff including:

- Enhanced ability to communicate in real time with residents.
- Promote the transition of paper/in person-based processes to digital self-serve options
- Allow staff to continue day to day operations of the community without being in the office
- Develop more streamlined processes to conduct business with the community

These tools allow the community to be prepared for any surge in COVID-19 cases or other public health concern. These preparations allow for more resiliency for the agency to face these challenges or any other natural or manmade disaster that may be faced.

#### Water, sewer, and broadband infrastructure Justification

As communities enhance their infrastructure gWorks' tools are developed to streamline and strengthen the development of new infrastructure projects, maintenance of current infrastructure, and allowing for seamless connections between these new projects and back-office software.

- Map all infrastructure assets, legal descriptions, easements, etc of the community to have an accurate database and GIS based map. (Physical Asset Management)
- Develop a fully digital, tracked, and visualized work order process (Physical Asset Management)
- Build an online resident facing tool to allow for feedback on projects. (Front Desk)
- Connected accounting, utility systems/billing, and resident portal to streamline billing, accounting, payment, and digital communication needs (FAM Core, Front Desk)
- Implement a unified HR tracking system to allow for employees to accurately track time to defined projects and cost centers (HR Hub, FAM Core)

The gWorks' system allows for a more efficient infrastructure investment process today and in the future. Investing in a full digitization allows for a more streamlined approach to develop new projects and continue to serve our residents efficiently.

#### **Revenue Replacement Justification:**

The revenue replacement bucket is the most generic category from Treasury. You will see often their guidance says, "Provision of Government Services". gWorks focus is to allow government employees to efficiently deliver on requirements of state and federal requirements, interactions across the organizations staff, and build a digital focus of resident interaction.

A reminder, this is just a guideline, not legal or financial advice. For your community's needs, please check with your team to ensure that you are meeting your requirements for ARPA expenditures. For additional questions or color, please get with me and I am happy to bring our internal teams to the table to help build your unique justification.
