Owner or Tenant Use

Desired Water Meter Size: √ Standard residential 5/8 – 3/4 inch

The Utility agrees to sell and deliver water to the Customer and the Customer agrees to purchase and receive water from the Utility in accordance with the rules and regulations of the TCEQ (Texas Commission on Environmental Quality) and at the current rate set by the Utility (subject to change).

All water will be measured by meters which are furnished, installed, owned, and maintained by the Utility. The meter and/or connection is for the sole use of the Customer to serve water to one dwelling or property. The Customer shall not share, resell, or submeter water to any other dwelling, property, etc., without the specific written authorization of the Utility and in compliance with applicable laws and regulations.

SERVICE AGREEMENT - VILLAGE OF SAN LEANNA

I. PURPOSE: I. PURPOSE:

The water system is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this service agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The utility enforces these restrictions to ensure the public health and welfare. Each customer must sign the agreement before the above-named utility will begin service.

II. PLUMBING RESTRICTIONS:

The following unacceptable plumbing practices are prohibited by State regulations:

- A. No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system by an air gap or an appropriate backflow prevention device.
- B. No cross connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air gap or a reduced pressure zone backflow prevention device.
- C. No connection which allows water to be returned to the public drinking water supply is permitted.
- D. No pipe or pipe fitting which contains more than 8.0% lead may be used for the installation or repair of plumbing at any connection which provides water for human use.
- E. No solder or weld which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use.

III. SERVICE AGREEMENT:

The following are the terms of the service agreement between the utility and the customer:

- A. The utility will maintain a copy of this agreement as long as the customer and/or the premises is/are connected to the water system.
- B. The customer shall allow the property to be inspected for possible cross-connections and other unacceptable plumbing practices. These inspections shall be conducted by the utility or its designated agent prior to beginning new water service when there is reason to believe that a cross-connection or other unacceptable plumbing practice exists or after any major changes to the private plumbing facilities. These inspections shall be conducted during the utility's normal business hours.
- C. The utility shall notify the customer in writing of any cross-connection or other unacceptable plumbing practice which has been established during the initial inspection or the periodic reinspections.
- D. The customer shall immediately correct any unacceptable plumbing practice on their premises.
- E. The customer shall, at their expense, properly install, test and maintain any backflow prevention device requested by the utility. Copies of all testing and maintenance records shall be provided to the utility.

IV. ENFORCEMENT:

If the customer fails to comply with the terms of the Service Agreement, the utility shall, at its option, either terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this agreement shall be billed to the customer.
